Subject: Arkwood 3rd FYR
Date: 03/25/2011 02:26 PM

Jean: Don Williams (DW) wants me to answer the following re: 3rd FYR.

Actions Needed: **Wants me to add anticipated Site wide reuse determination of January 2011**

Actions needed:: The New Cricket Spring gw treatment system should continue until water exiting.....ADEQ PCP standard for PCP is reached at the Arkwood Site. " Seems in conflict last sentence in summary paragraph about natural attenuation-----
 ----Also Kurt Grisham says metes and bounds was fixed already" Don Williams
 SG: I am thinking of deleting "the gw will continue to naturally attenuate over time" in GW Remediation on pg viii

p 7

B. Remedy Implementation : who is MMI---write the name out ---- **DW**

p8----b. Site characterization; **confusing** , JUST SAY 11600 CUBIC YDS OF BACKFILL WAS USED

C. P8----- gw Remediation

how low below ground surface is the shallow ground water : DW

Table 2: What are the units of PCP ? **Ans ppb ??**

p23 Interviews what about city or other property owners ? DW

Any help-- answers or language will be extremely helpful----- Send to
